

## **SML - ACBS FALL WORKSHOP SATURDAY, OCTOBER 28, 2017**

**PLACE:** 1100 Oakshire Lane, Wirtz, VA 24184  
(Scruggs Rd. to Lovely Valley, Right on Lovely Valley,  
Lovely Valley to Burnt Chimney, Left on Burnt  
Chimney to Crafts Ford. Right on Crafts Ford to  
Oakshire. Proceed to #1100 on right past the tennis court.)

**TIME:** 9 AM to Noon, Doors open @ 8:30 AM for coffee  
**COST:** \$5.00 USD. (Includes coffee, donuts, and lunch)

### **PRESENTERS:**

**Michael Turner** from Lake Champlain, VT. will talk about the years he spent at the Hacker Craft boat factory, Silver Bay, Lake George while Bill Morgan ran the operation. He designed many "one of a kind" boats and tweaked many other old designs to accept modern power plants and faster speeds.

**Bob Pennoyer** will talk about how to trouble shoot a boat engine that suddenly quits while out on the water. That includes both inboards and outboard motors.

**Alan Frederick** will walk you through the "mystery" of inboard engine shaft alignment. Is it the coupling, shaft, prop, or strut bearing that is causing all that vibration. Stay tuned for the solutions.

So, bring all your questions and our panel of experts will try and find the answers for you.

Lunch with beverages will be served at noon.

This will be the last workshop for 2017 so don't miss the boat.

For further information, call Alan Frederick @ (540) 352-8653
